

## Jake's Postcard Season 9 Episode 4

Hi everyone!

Professor Z let me dig for bones in Quarry A today! Well, I'm not sure why they call it a dig, because you don't use a shovel, just a little pick ax and a paintbrush. The bones are very brittle and you have to be oh so careful. We found 53 bones just in our quarry. Mostly teeth and vertebrae. I asked Professor Z what kind of dinosaurs these are and he said they're Edmontosaurus and triceratops and allo—something. (Allosaurus fragilis). Tonight, Professor Z pointed to the stars and reminded us that God created everything. I put my hand up to ask a question, but I don't think he saw me.

Over and out,  
Jacob P. Donovan
