

## Jake's Postcard Season 9 Episode 5

Hi everyone!

Guess what?! We found a T-Rex femur in Quarry C today (tell Jamey a femur is a leg bone). It is AMAZING! I asked Professor Z if I could use the theodolite to measure how deep the bone was buried. He said that expensive equipment doesn't grow on trees and his answer was no. Did you know this is one of the only dig sites that teaches students that God created the world in 6 days? And, it might not stay open much longer because, as Professor Z said tonight, "this whole operation ain't cheap!" I asked him what was so expensive and he pointed to my plate of food. Did he mean that I eat a lot?

Over and out,  
Jacob P. Donovan
